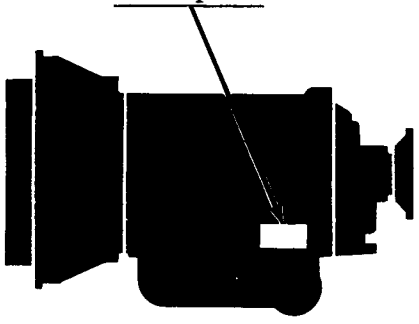
MODELS COVERED

The Allison MT series models covered in this catalog are listed beginning on page 7. There, the Allison transmission assembly numbers (A/N or P/N) are cross-referenced with customer, and customer part numbers. The suffix letter "R" following the A/N indicates a Factory rebuilt transmission.

YOU MUST KNOW TRANSMISSION PART NUMBER

To use this catalog you must know the Allison assembly number (A/N) found on the transmission name plate. The name plate is attached to the rear of the left side of the housing.



PARTS KITS

Available service parts KITS are listed on page 5.

NUMERICAL INDEX

A numerical index is included in the rear of this catalog. This index is cross-referenced to indicate the developmental history of all MT parts from 62 and later models. All parts both current and superceded appear in numerical order in the Part No. column. Current part numbers refer to the figure and reference numbers of the parts. All parts replacing older parts are followed by the older part number in the history column. Parts that have been replaced are followed by the part number of the replacing part. Footnote symbols show when a part is replaced by (RB), or when a part replaces (R) an older part.

CROSS SECTION

A cross sectional view of the transmission and available options are shown on a foldout at the back of this catalog.

NOTE

All parts orders must be directed to your dealer – do not send them to Allison. Always include the model, the transmission assembly, and serial numbers when ordering parts. Be sure to include part name and part number.

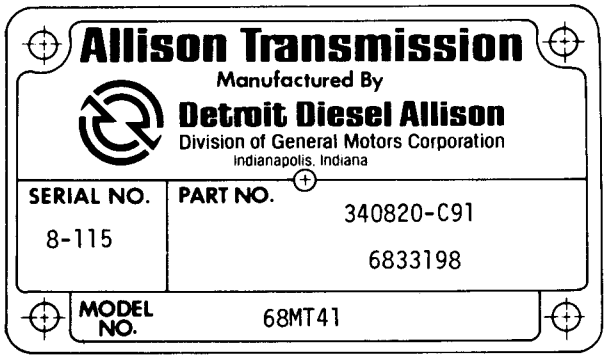
HOW TO ORDER PARTS

If an assembly or subassembly is ordered, all subassemblies and detail parts indented beneath it will be included.

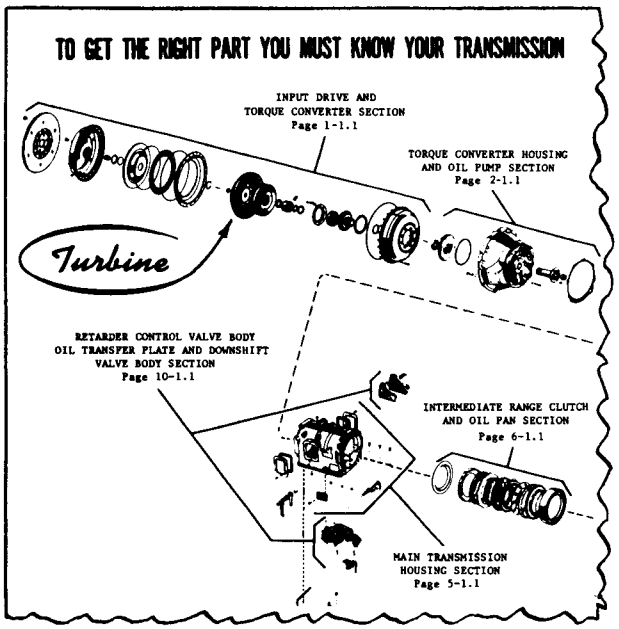
If a detail part is ordered, only the detail part will be sent unless its part number is starred (*). A starred (*) part number means that such a part is not serviced alone. This is necessary because certain parts require factory installation or adjustment. If an order is received for a starred (*) part, the assembly or subassembly under which it is indented will be sent.

HOW TO USE THIS CATALOG

Example: To find the part number of a torque converter turbine, follow the procedure outlined below:



Obtain the transmission part number (P/N or A/N) and serial number shown on the name plate as illustrated. It reads 6833198.



Turn to the pictorial index of exploded parts. The turbine is shown in the Torque Converter Section which is referenced to page 1-1.1.
