

Detroit Diesel Engines

SALES TECHNICAL DATA BOOK REVISION

BOOK V

VOLUME 1

FORM 18SA0105-01

DETROIT DIESEL ALLISON • DIVISION OF GENERAL MOTORS CORPORATION • DETROIT, MICHIGAN, 48228

REVISION NO. 3

DATE November, 1977

Revision #3 consists of application information for Marco Industrial Products Division.

Insert Revision #3 as follows:

Open the book to the Applications section (first white tab). Insert the new page between the "Lipe Rollway (W. C. Lipe)" and the "Rockford Clutch" information.

After updating your book, be sure to check off box 3 and add the date 11/77 to the yellow check-off sheet.

ATTENTION

ALL SALES TECH DATA BOOK HOLDERS

Early Sales Tech Data Books contained yellow "Business Reply Cards" which book holders were asked to complete and mail when the books were received. These cards formed the basis of a mailing list DDA used for sending out revisions. At the present time individuals who order Sales Tech Data Books are automatically added to the supplement mailing list.

Book holders who have yellow "Business Reply Cards" in their books should mail them in immediately so that their names can be added to the supplement mailing list.

NOTE: Receipt of these cards does not imply that DDA can provide past updates, since some revisions are no longer available.

FLYWHEEL DATA BOOK CONTENTS BY SECTIONS

HOW TO USE THIS BOOK

A brief description of the steps required to find flywheel information.

APPLICATION INDEX

An alphabetical listing of powertrain manufacturers or users and the flywheels designed for their specific applications (clutches, transmissions, torque converters, power take-offs, etc.). This section also contains:

- The DDA flywheel production groups (6C3 groups)
- Engine Models using these groups
- Sheet (page) number in the DETAIL DIMENSIONAL DATA INDEX where detailed flywheel information can be found

FLYWHEEL DETAIL INDEX

A numerical index showing:

- Flywheel detail and assembly numbers
- Ring gear part numbers
- ring gear chamfer (if used)
- Pilot bearing part numbers (if used)
- Flywheel and ring gear assembly WR^2 (moment of inertia in lb-in²)
- Dimension index - tab in the DETAIL DIMENSIONAL DATA INDEX under which flywheel dimensions can be found.

FLYWHEEL GROUP INDEX

A numerical listing of 6C3 groups (production groups) cross - referenced to the flywheel assemblies found in them plus the flywheel detail numbers.

FLYWHEEL ASSEMBLY INDEX

A numerical listing of flywheel assemblies cross-referenced to their detail numbers and the 6C3 groups (production groups) that use them.

DETAIL DIMENSIONAL DATA

Nominal dimensions of flywheels listed by engine series, SAE size, and type of flywheel.

PILOT BEARING

Part numbers and nominal dimensions of pilot bearings used with the flywheels.

STARTER AND RING GEAR

Starter pinion data, flywheel ring gear and flywheel housing starter mounting hole center distance combinations. Use for proper match of starter pinion, flywheel ring gear, and flywheel housing.

FLYWHEEL HOUSING DIMENSIONS

Nominal dimensions of standard and non-standard flywheel housings by engine model and SAE size. Dimensions consist of:

- Flywheel housing length
- Housing face-to-crankshaft butt measurement
- Rear of block-to-crankshaft butt measurement

OBSOLETE FLYWHEEL DATA

THIS SECTION PROVIDES INFORMATION ON CUSTOMER MACHINING OF SOME OBSOLETE SERIES 53 AND 71 FLYWHEELS FROM ROUGH BLANK FLYWHEEL CASTINGS. THE SELECTION OF FLYWHEEL NUMBERS IS LIMITED, BUT IT IS AN ALTERNATIVE IN SOME CASES. OBSERVE CAUTIONS AT THE FRONT OF THIS SECTION.

HOW TO USE THE FLYWHEEL DATA BOOK

Let's assume you want to attach a flywheel and flywheel housing onto a 8V-71 engine, Model 7083-7000, matched to a Cotta GR-12E Transmission. The transmission calls for an SAE #1 clutch housing, a Twin Disc 1BF-214 clutch located about one inch from the face of the flywheel housing, and a pilot bearing having 1.1811 inch inside diameter. What flywheel do you use?

How To Find Flywheel Information

Step 1. Open the Data Book to the APPLICATIONS section (First Tab). Find the "Cotta Transmission" listing in the alphabetically arranged index (Pages). Run down the "Clutch Model" column until the clutch model number (TD-IBF-214) lines up with the transmission number (GR-12E). Note that the following information appears on the same line:

- The flywheel detail number - 5189446
- The 6C3 (Flywheel Production) group number - 6C3-279
- The engine model number - 8V-71
- The sheet number (The Dimension Index Number) - 71-1A3

Write down the flywheel detail number and the sheet number.

Step 2. Open the book to the FLYWHEEL DETAIL INDEX (Second Tab). Page thru this section until you locate the flywheel detail number (5189446) in the extreme left-hand column (see page). In the column next to this number you'll find:

- The flywheel assembly number - 5189446

- The 6C3 (Production) group number(s) containing this flywheel - 6C3-279
- The flywheel ring gear part number - 5184773
- Whether or not the ring gear ~~teeth~~ are chamfered - in this case, they're not.
- The pilot bearing part number (if used) - 7451256
- The flywheel and ring gear assembly WR^2 (moment of inertia in lb-in^2) - 10,472
- The dimension index number - 71-1A3

NOTE: The availability of flywheels indicated as "Pattern Obsolete", "Inactive", "Not Released", or having a line through the entry should be checked with the factory prior to commitment.

Step 3. If more detailed flywheel information is needed, refer to the "dimension index number" (71-1A3). Turn to the corresponding page in the DIMENSION INDEX (Series 71, SAE No. 1). The dimension index number is coded to the tabs in this index and is read as follows:

Engine Series	Housing SAE Size	Clutch Type	Page No.
<u>71</u>	<u>1</u>	<u>A</u>	<u>3</u>

EXAMPLE: Detailed information on flywheel 5182596 appears under tab "Series 71, SAE No. 1", on page 71-1A3 (the letter "A" indicates a drive ring type clutch). Turn to page 71-1A3 and find the flywheel number at the top of the page. Note the dimensional references from

"A" to "Z" in the column under this number.

These dimensions must be used with the drawing(s) located behind the tab at the front of the section (See Page 71-1A3).

If a clutch or transmission number is not found in the APPLICATIONS section, contact the clutch or transmission manufacturer or sales representative. If this is impossible or if an answer is not obtained, contact Detroit Diesel Allison.

IMPORTANT

1. Data compiled in this book is based on information received from various Manufacturers. Consequently, any changes not communicated to DDA cannot be reflected in this book.
2. Flywheel dimensions shown on the sketches in the DETAIL DIMENSIONAL DATA section are not complete. Complete specifications can be obtained by referring to the Engineering Drawings (blueprints). Questionable applications should be referred to the Regional Office or to the application section of the Engineering Department.
3. Flywheels for 8V-53 engines are the same as for Series 71 engines. Crankshaft butt and ring gear dimensions are identical, except for minor differences in tolerance between the butt of the crankshaft and the face of the flywheel housing (See "Crankshaft Flywheel Mounting Face Dimensional Reference" Page).

4. All 16V-71 flywheels are included in the Series 92 Flywheel Section, since the 16V-71 and all Series 92 engines have the same crankshaft butt dimension.

SPECIAL NOTE: THE 8V-92 REQUIRES 12 LONG NECKED-DOWN BOLTS TO ATTACH THE FLYWHEEL TO THE CRANK-SHAFT, WHEREAS THE 16V-71 AND ALL OTHER 92 SERIES ENGINES USE ONLY 6 STANDARD LENGTH BOLTS. Refer to the maintenance manual of the specific engine to obtain the torque specifications of the flywheel attaching bolts.
