GENERAL INFORMATION

This Ford Industrial Engine Parts Catalog has been prepared to assist you, the owner, in identifying the correct replacement parts for your Ford Industrial Engine.

The catalog is divided into major sections which correspond to specific areas of the engine, such as cylinder block, cylinder head, crankshaft, oil pump, water pump, etc. Each of these sections is made up of illustrations followed by text for identifying detail parts.

ILLUSTRATIONS

The illustrations show typical assemblies but may not in all cases show the shape or details of parts required. However, the purpose of the illustrations is to identify parts through visual and descriptive assistance. Illustrations are located at the beginning of each section or immediately adjacent to the applicable text. Parts are identified on each illustration by reference numbers. Find the reference number of the part desired and locate it in the parts list reference column. As you will note, only the year, part name description and quantity are shown. When ordering replacement parts for your engine it will be necessary to contact your local Ford Power Products distributor whose phone number can be found on the inside cover of this parts list.

PARTS INFORMATION

Each listing contains illustrations, reference number, the effective year range, part name including description, and the quantity required to assist in identifying the correct part.

SYMBOLS IN YEAR COLUMN

- 72 Parts used commencing with initial production of engines are indicated by only the year in which production commenced.
- 72/75 Parts used for a period of years and then discontinued are indicated in the year column by a commencing and finishing year.
- 75/ Parts still used in current production are indicated by the commencing year followed by a slant (/).

NOTE: The descriptions and specifications contained in this manual were in effect at the time the book was released for printing. Ford Motor Company reserves the right to discontinue models at any time, or change specifications or design, without notice and without incurring obligation.

New Additions to Your Wide World of Ford Power

Ford wide world of power offers you these new proven performers for your engine and power unit needs. These new engines range from three to eight cylinders, V-types, in-lines, gas and diesel.

SSD-327 (Diesel)
3-Cylinder, 2.7 Litre, 168 CID

SSD-437 (Diesel)
4-Cylinder, 3.7 Litre, 224 CID

SSD-655 (Diesel)
6-Cylinder, 5.5 Litre, 335 CID

SSD-681 (Diesel)
6-Cylinder, 8.1 Litre, 495 CID

YSD-424 (Diesel)
4-Cylinder, 2.4 Litre, 144 CID

LSG-423 & LSG 633
4 & 6-Cylinder, Gasoline
2.3 Litre and 3.3 Litre

Ford's New SSD Diesel Series . . . in 3, 4, and 6 Cylinders

Your Ford Power products distributor has engines for a wide range of jobs!

The exciting new SSD Diesel Engine Series consists of two basic families . . .

The first family consists of:

- The three cylinder, naturally aspirated SSD-327, the four cylinder SSD-437, and the six cylinder SSD-655.

The second family consists of:

- The six cylinder SSD-681.

An important feature for the parts and service managers is that both the three and four cylinder engines share a similar bore and stroke with the 6 cylinder SSD-655M. Many parts are common to help reduce costly parts inventories.

Be sure to get your parts & service from the man who knows your engine best — your Ford Power Products Distributor. He is listed on the inside cover.

SSD-327
3 Cylinder,
2.7 Litre, 168 CID

SSD-437
4 Cylinder,
3.7 Litre, 224 CID

SSD-655
6 Cylinder,
5.5 Litre 335 CID

SSD-681
6 Cylinder
8.1 Litre, 495 CID
