JOHN DEERE SERIES 300 OEM ENGINES

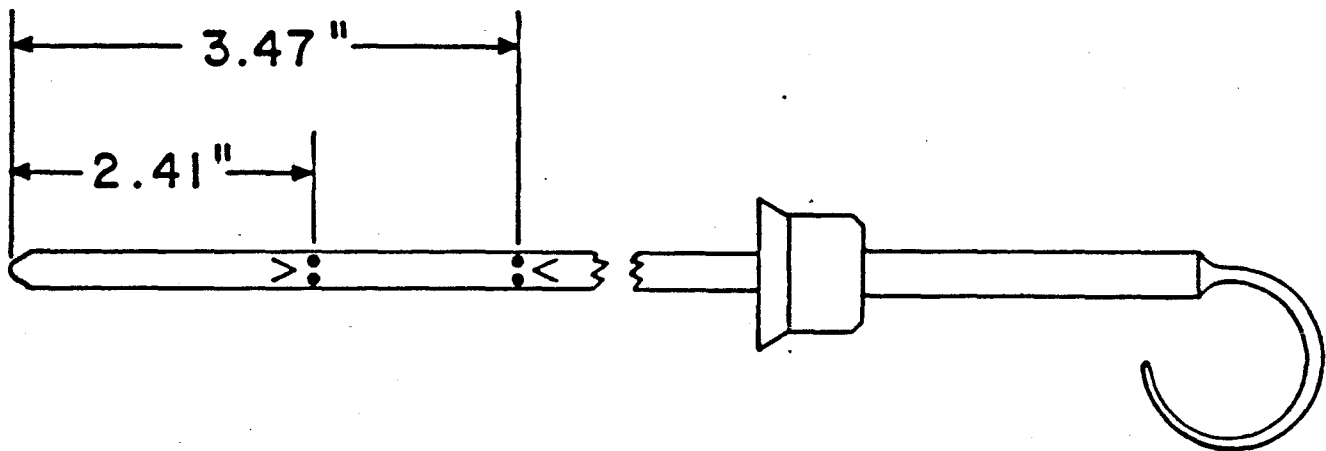

Because of today's rapidly changing nature of fuels and lubricants, the following changes have been approved and are now in effect:

A. All 300 Series Engines

1. Oil change interval has been changed from 200 hours to 100 hours

B. 3164D - 4219D Model Engines

1. Crankcase oil fill capacity has been increased from 6 to 9 quarts with filter change
2. To increase the crankcase capacity of 3164D - 4219D engines from 6 - 9 quarts either remark the present AT21534 dipstick (see sketch) or install a new dipstick part number AR78192.

All customers should be informed of these changes and advised to implement them immediately.
