ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

To be complete, your LANE 1 machine order must at least contain:

- 1) Distribution Center Arrangement (DCA)
- 2) 0P-9001 Lane 1 order
- 3) Service Instruction Language
- 4) Packing (ex.0P numbers)

The secondary exit hatch kit and change instructions is available through the Parts System.
The secondary exit hatch kit allows dealers to convert the standard hatch to a secondary exit hatch, which is required in British Columbia

ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

To be complete, your LANE 1 machine order must at least contain:

- 1) Distribution Center Arrangement (DCA)
- 2) 0P-9001 Lane 1 order
- 3) Service Instruction Language
- 4) Packing (ex.0P and 0G numbers)

Exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 Indicator) and adding Priority Code "L2" to the order.
No additional Lane 2 or 3 items may be added to the order.

QUICK COUPLERS

Quick Coupler Buckets are listed in the BUCKETS section

BUCKETS***BUCKETS***

NOTE: Stick, bucket linkage and bucket must be matched.

Include tooth adapters welded on cutting edge.
Do not include tooth tips or sidecutters
Rated capacity, SAE heaped.

NOTE: PLEASE CONSIDER LIFTING CAPACITIES WORKING WEIGHT TABLES
(SEE PERFORMANCE HANDBOOK) VERSUS MATERIAL DENSITY FOR PROPER
BUCKET CAPACITY SELECTION.

IDENTIFICATION**NOTE:**

Caterpillar offers a complete line of high quality buckets and tools
For specific bucket and tool needs not covered in the price list,
or for consideration to factory install any tools not shown
in this price list, contact the Caterpillar Tool Center
at (31) 736.399.777 or Fax: (31) 736.428.105

For bucket-only miscellaneous orders, use reference 0G related to your
local WT-HEX pricelist on your miscellaneous order.
Bucket-only orders will be shipped from a new loose bucket logistics
system. These orders can include GET and/or Bucket Adjusters with the
Bucket. For tear drop pin buckets, the loose bucket orders can
include GET and/cludear Drop pin conversion
arrangement. This logistics system is managed by the Caterpillar
Work Tools & Services based in the former Verachttert facility in
Den Bosch in the Netherlands. While actual bucket manufacturing
source is unchanged, a new source code identified as LVA
has been added to the corporate system.

**These buckets feature are curved profile as requested by
European users and includes: PIN-ON Buckets include an adjuster group
TECHNICAL: Bucket adjuster group eliminates bucket backlash.**

ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

To be complete, your LANE 1 machine order must at least contain:

- 1) Distribution Center Arrangement (DCA)
- 2) 0P-9001 Lane 1 order
- 3) Service Instruction Language
- 4) Packing (ex. 0P numbers)

Effective 12 September, 2011, exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 Indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

To be complete, your LANE 1 machine order must at least contain:

- 1) Distribution Center Arrangement (DCA)
- 2) 0P-9001 Lane 1 order
- 3) Service Instruction Language
- 4) Packing (ex.0P and 0G numbers)

Effective 12 September, 2011, exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 Indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

The secondary exit hatch kit and change instructions is available through the Parts System

The secondary exit hatch kit allows dealers to convert the standard hatch to a secondary exit hatch, which is required in British Columbia

ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

Effective 12 September, 2011, exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 Indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

The secondary exit hatch kit and change instructions is available through the Parts System
The secondary exit hatch kit allows dealers to convert the standard hatch to a secondary exit hatch, which is required in British Columbia

HD BOOM/STICK/LINKAGE PACKAGES

For Auxiliary hydraulic boom & stick lines packages,
please refer to the LINE GROUPS SECTION.

HD = "Heavy Duty Reach" used for reach applications where conditions
are optimal. The combination of boom and stick are matched to
the digging conditions, not harsh application such as extreme
demolition. It should be used for demanding applications,
such as dirt, rock and hammer use.

Applications: When reach is needed for excavating basements,
trenching in utility lines and sewer applications.

**NOTE: HD FRONT CAN ONLY BE CONFIGURED WITH 13,228LB/ 6.0 TON
COUNTERWEIGHT OPTION, HD STICK AND HD BOOM.**

For Auxiliary hydraulic boom & stick lines packages,
please refer to the LINE GROUPS SECTION.

ES = "Extreme Service" used for more demanding applications, such as improved lift or heavy lifting, 100% rock, extensive hammer use or demolition.

Applications: Hydromechanical work tools or larger buckets - 66" & 72" used in "Extreme" applications where stress loads on the Boom are increased. Where harsh conditions are present where the HD Reach Boom is not recommended.

ES - Extreme Service will provide improved durability at a weight premium which can impact bucket size and cycle times. Used for high volume production and loading.

NOTE: ES FRONT CAN ONLY BE CONFIGURED WITH 15,432/ 7.0 TON COUNTERWEIGHT OPTION, ES STICK AND ES BOOM.

MASS BOOM/STICK/LINKAGE PACKAGES - LANE 3 ONLYFor Auxiliary hydraulic boom & stick lines packages,
please refer to the LINE GROUPS SECTION.

ME = "Mass Excavation" used for high volume production and loading applications. The boom, stick, and bucket linkage are all designed for maximum digging forces in harsh conditions to maximize production and durability. The working envelope/reach will be less due to the use of shorter boom and stick lengths.

Note this configuration uses a different bucket linkage as compared to the Reach configuration and allows the use of slightly larger bucket capacities to maximize production.

NOTE: MASS FRONT CAN ONLY BE CONFIGURED WITH 13,228LB/ 6.0 TON COUNTERWEIGHT OPTION, MASS STICK AND MASS BOOM.

ORDERING INSTRUCTIONS:

FOR AN EXPLANATION OF LANE STRATEGY AND ORDERING INSTRUCTIONS, PLEASE REFER TO THE SALES MODEL "GENERAL" POSTED IN THE WEB PRICE LIST.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments

Effective 01 January, 2012, exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 Indicator) and adding Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

The secondary exit hatch kit and change instructions are available through the Parts System. The secondary exit hatch kit allows dealers to convert the standard hatch to a secondary exit hatch, which is required in British Columbia.

QUICK COUPLERS

Quick Coupler Buckets are listed in the BUCKETS section

BUCKETS***BUCKETS***

NOTE: Stick, bucket linkage and bucket must be matched.

Include tooth adapters welded on cutting edge.
Do not include tooth tips, sidecutters or protectors.
Rated capacity without GET, according to ISO 7451 1:1 heaped.

NOTE: PLEASE CONSIDER LIFTING CAPACITIES WORKING WEIGHT TABLES
(SEE PERFORMANCE HANDBOOK and MACHINE SPECALOG) VERSUS MATERIAL
DENSITY FOR PROPER BUCKET CAPACITY SELECTION.

IDENTIFICATION**NOTE:**

Caterpillar offers a complete line of high quality buckets and tools
For specific bucket and tool needs not covered in the price list,
or for consideration to factory install any tools not shown
in this price list, contact the Caterpillar Tool Center
at + 31.73.6399.777 or Fax + 31.73.6399.893

For bucket-only miscellaneous orders, use reference 0G related to your
local WT-HEX pricelist on your miscellaneous order.
Bucket-only orders will be shipped from a new loose bucket logistics
system. This logistics system is managed by the Caterpillar
Work Tools & Services based in the former Verachttert facility in
Den Bosch in the Netherlands. While actual bucket manufacturing
source is unchanged, a new source code identified as LVA
has been added to the corporate system.

**These buckets are engineered according to the Caterpillar
Design Optimisation principles and feature a worldwide offered profile
The pin-on buckets includes an adjuster group to eliminate bucket
backlash.**

TECHNOLOGY PRODUCTS**PRODUCT LINK**

Product link is mandatory for countries where it's authorised. Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor performance of your assets to help keep your jobs schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Availability varies by country. Please Contact your Cat marketing representative with questions.

PRODUCT LINK - SATELLITE

Satellite Product Link uses a satellite network for transmission of asset information including location, utilization and condition. For use in areas with poor or no cellular coverage.

BUCKETS (CONT.)**IDENTIFICATION****NOTE:**

Caterpillar offers a complete line of high quality buckets and work tools.

For specific bucket and work tool needs not covered in the price list, or for consideration to factory install any work tools not shown in this price list, contact the Caterpillar Tool Center:

For US-A market: 1-800-255-2372 or Fax: 1-785-456-6302

For EAME market: (31) 736.399.777 or Fax: (31) 736.428.105

Please refer to your local WT-HEX pricelist for buckets not shown in the machine pricelist.

For bucket-only miscellaneous orders, use reference 0G related to your local WT-HEX pricelist on your miscellaneous order.

Bucket-only orders will be shipped from a new loose bucket logistics system. These orders can include GET and/or Bucket Adjusters with the Bucket. For Tear Drop Pin buckets, the loose bucket orders can include GET and/or Tear Drop Pin conversion arrangement. This logistics system is managed by Caterpillar Work Tools & Services based in the former Verachtert facility in Den Bosch in the Netherlands. While actual bucket manufacturing source is unchanged, a new source code identified as LVA has been added to the corporate system.

For GCN, the buckets will need to be ordered from Antares. Please see the WT-HEX pricelist or your Cat Worktool Sales rep for a list of buckets available for this machine.

TECHNOLOGY PRODUCTS**PRODUCT LINK**

Product link is mandatory for countries where it's authorised.
Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor performance of you assets to help keep your jobs schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Availability varies by country. Please Contact your Cat marketing representative with questions.

(SEE PERFORMANCE HANDBOOK) VERSUS MATERIAL DENSITY FOR PROPER
BUCKET CAPACITY SELECTION.

IDENTIFICATION

NOTE:

Caterpillar offers a complete line of high quality buckets and work tools.

For specific bucket and work tool needs not covered in the price list, or for consideration to factory install any work tools not shown in this price list, contact the Caterpillar Tool Center:

For US-A market: 1-800-255-2372 or Fax: 1-785-456-6302

For EAME market: (31) 736.399.777 or Fax: (31) 736.428.105

Please refer to your local WT-HEX pricelist for buckets not shown in the machine pricelist.

For bucket-only miscellaneous orders, use reference 0G related to your local WT-HEX pricelist on your miscellaneous order.

Bucket-only orders will be shipped from a new loose bucket logistics system. These orders can include GET and/or Bucket Adjusters with the Bucket. For Tear Drop Pin buckets, the loose bucket orders can include GET and/or Tear Drop Pin conversion arrangement. This logistics system is managed by Caterpillar Work Tools & Services based in the former Verachttert facility in Den Bosch in the Netherlands. While actual bucket manufacturing source is unchanged, a new source code identified as LVA has been added to the corporate system.

For GCN, the buckets will need to be ordered from Antares. Please see the WT-HEX pricelist or your Cat Worktool Sales rep for a list of buckets available for this machine.

BUCKETS (CONT.)**IDENTIFICATION (Cont.)**

For specific bucket and work tool needs not covered in the price list, or for consideration to factory install any work tools not shown in this price list, contact the Caterpillar Tool Center:
 For US-A market: 1-800-255-2372 or Fax: 1-785-456-6302
 For EAME market: (31) 736.399.777 or Fax: (31) 736.428.105
 Please refer to your local WT-HEX pricelist for buckets not shown in the machine pricelist.

For bucket-only miscellaneous orders, use reference 0G related to your local WT-HEX pricelist on your miscellaneous order.
 Bucket-only orders will be shipped from a new loose bucket logistics system. These orders can include GET and/or Bucket Adjusters with the Bucket. For Tear Drop Pin buckets, the loose bucket orders can include GET and/or Tear Drop Pin conversion arrangement. This logistics system is managed by Caterpillar Work Tools & Services based in the former Verachttert facility in Den Bosch in the Netherlands. While actual bucket manufacturing source is unchanged, a new source code identified as LVA has been added to the corporate system.

For GCN, the buckets will need to be ordered from Antares.
 Please see the WT-HEX pricelist or your Cat Worktool Sales rep for a list of buckets available for this machine.

TIRES, RIMS, AND WHEELS***(Must select one)***

Due to industry wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

TIRES, RIMS, AND WHEELS***(Must select one)***

Due to industry wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

TIRES, RIMS, AND WHEELS***(Must select one)***

Due to industry wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

Two sets required for tractor and scraper combined. When ordering, one of the following tire groups must be specified. This machine has been designed to run on 33.25-29 sized tires.

To select the correct tire that will be appropriate for the application and job site conditions, contact the tire manufacture or local tire dealer.

TIRES, RIMS, AND WHEELS***(Must select one)***

Due to industry wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

Two sets required for tractor and scraper combined. When ordering, one of the following tire groups must be specified. This machine has been designed to run on 33.25-29 sized tires.

To select the correct tire that will be appropriate for the application and job site conditions, contact the tire manufacture or local tire dealer.

TIRES, RIMS, & WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied we may contact the dealer, however, in some cases we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire brand and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied we may contact the dealer, however, in some cases we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire brand and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

TIRES, RIMS, & WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied we may contact the dealer, however, in some cases we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire brand and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

For an explanation of Lane Strategy and ordering instructions please refer to the sales model "GENERAL" posted in the web price list.

You must order your machine from Lane 1, Lane 2, or Lane 3.
The lane you order from will determine capability to order additional attachments and service level you will receive.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS

Exact Lane 1 configurations may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P9001 Lane 1 indicator) and Priority Code "L2" to the order. No additional Lane 2 or 3 items may be added to the order.

ORDERING INSTRUCTIONS

For an explanation of Lane Strategy and ordering instructions please refer to the sales model 'GENERAL' posted in the web price lists.

You must order your machine from Lane 1, Lane 2 or Lane 3.

Your lane selection will determine the range of additional attachments you may order and the service level you will receive.

If no reference number is listed, a Lane 1 configuration is not available.

LANE 1 DISTRIBUTION CENTER ARRANGEMENTS (DCA's)

TO COMPLETE A LANE 1 ORDER

your order must at least contain

- 1: Distribution Center Arrangement (DCA). See choices above.
- 2: 0p-9001 Lane 1 Order
- 3: Selection from each section of the 'LANE 1 MANDATORY' section
- 4: Packing References

Exact Lane 1 configurations for this model may also be sourced from the factory with Lane 2 availability by using the same reference numbers except 0P9222 Lane 2 Special Indicator (instead of 0P-9001 Lane 1 Indicator) and adding Priority Code -L2- to the order. No additional Lane 2 or 3 items may be added to the order.

BUCKETS

Packing reference 0G-3281 required if ordered 'not-installed'.

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.

Offered with:

- 1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
- 2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging.

FEATURE PACKAGES

Select one

L	425-9666	FEATURE PACKAGE, BASIC 0	\$1,825
		Basic package does not include new electronically controlled features such as Ride Control, Return To Dig, Lift Kickout, Electronic Throttle Lock, Rimpull Control, Creeper Control, Implement Modulation control nor Drivetrain Aggressiveness control.	
L	425-9668	FEATURE PACKAGE, ROAD 0	\$2,900
		This package includes:	
		1) Electronic Throttle Lock,	
		2) Automatic Ride Control	
		3) Variable Speed Creeper Control	
		4) Electronic Implement Modulation	
		5) Hystat Aggressiveness Control.	
		Electronic Throttle Lock maintains the engine speed at any RPM, adjustable at any time. Creeper Control compliments Electronic Throttle Lock by controlling the ground speed regardless of engine speed. Together these two features are normally used for broom, mower or snow blower applications where high engine speed is needed for the hydraulic power, but ground speed must be slow.

		This package includes: 1) Rim Pull Control (three electronic settings to select 60%, 80% and 100% full power), 2) Return to Dig, 3) Lift Kickout 4) Implement Modulation 5) Hystat Aggressiveness control. Rim Pull Control reduces the amount of tire slip in poor underfoot, preventing excessive tire wear. When the lift is pulled back to a detent, Lift Kickout will stop the loaders arms at a preset height. Implement Modulation increases joystick aggressiveness with three selections on the right console soft touch pad. Similarly, the Hystat Aggressiveness has three selections for shift smoothness and directional change aggressiveness.		
L	425-9677	FEATURE PACKAGE, ROAD & LOAD 0		\$3,500

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire type cannot be supplied, we will contact the dealership to propose alternatives. The dealership must then choose between an alternative tire or "rims only" (where available) within 72 hours. If no response is provided by the deadline the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new

TIRES, RIMS, AND WHEELS

(MUST SELECT ONE)

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire type cannot be supplied, we will contact the dealership to propose alternatives. The dealership must then choose between an alternative tire or "rims only" (where available) within 72 hours. If no response is provided by the deadline the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new

TIRES, RIMS, AND WHEELS

(MUST SELECT ONE)

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire type cannot be supplied, we will contact the dealership to propose alternatives. The dealership must then choose between an alternative tire or "rims only" (where available) within 72 hours. If no response is provided by the deadline the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

TIRES, RIMS, AND WHEELS (CONT.)***Flexport Tires***

Cat Flexport are solid tires designed for severe applications where normal tires would be quickly damaged like in scrap or waste handling. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. The increased tires flexibility allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or filled foam tire passes on to the operator and machine. The result is increased operator comfort, reduced operator fatigue and reduced machine stress.

P	365-3745	FLEXPORT, 23.5 R25 OFF ROAD 0		\$13,080
		Off-the-Road (OTR) tires, highly recommended for glass, asphalt, brick and scrapyards. Machine oscillation is reduced.		
P	365-3746	FLEXPORT, 65* 13* 23.5 SMOOTH 0		\$15,590
		Smooth Tread tires for applications where traction is not a concern but where the material, like glass, can cause chunking of a construction type tread. Machine oscillation is reduced.		

TIRES/RIMS, ALLOWANCE FOR OMISSION - LANE 3 ONLY

NOTE: Dealers should contact Caterpillar Account Coordinator if they plan to use a tire not offered on the price list. Some tires may require axle oscillation stops or other machine modifications.

TIRES, RIMS, AND WHEELS***RADIAL TIRES***

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice.

If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changes at that point.

As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

All Tires are tubeless, include rims, and come in a set of 4.
Tires are non-directional & tubeless.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

NOTE: Reference the TRA Classification below when selecting tires to ensure the machine has the appropriate tire for the machines application.

TIRES, RIMS, AND WHEELS (CONT.)***FLEXPORT TIRES***

Cat Flexport are solid tires designed for severe applications where normal tires would be quickly damaged like in scrap or waste handling. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. The increased tires flexibility allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or filled foam tire passes on to the operator and machine. The result is increased operator comfort, reduced operator fatigue and reduced machine stress.

TIRES, RIMS, AND WHEELS				

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

TIRES, RIMS, AND WHEELS (CONT.)**FLEXPORT TIRES**

Cat Flexport are solid tires designed for severe applications where normal tires would be quickly damaged like in scrap or waste handling. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. The increased tires flexibility allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or filled foam tire passes on to the operator and machine. The result is increased operator comfort, reduced operator fatigue and reduced machine stress.

P	394-3949	FLEXPORT, 26.5 R25 SMOOTH 0		\$17,310

WORK TOOLS**AVAILABILITY FOR BUCKETS**

NOTE: "GET" is NOT automatically included on bucket orders.
GET must be entered on the order with your bucket selection, unless text for bucket states otherwise.
Please make the "GET" selection from "GET" listed immediately following the bucket listing.

NOTE: Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for General Purpose Buckets and material handling buckets.

NOTE: Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maximum payload may cause loader instability.

NOTE: For availability of listed buckets & worktool please call (630-859-5320) or contact your marketing subsidiary machine coordinator.

TECHNOLOGY PRODUCTS**CAT CONNECT SOLUTIONS APPS**

Cat Connect Apps make smart use of technology allowing the operator and/or owner to monitor, control and manage equipment. Information is delivered on-board via an 18 cm (7in) color multi-function touch screen display and wirelessly to the VisionLink™ fleet management web portal (VisionLink subscription required). The multi-function display as well as the Core and Basic Apps are standard equipment.

Note: the image from the standard rear-view camera is also displayed on the multi-function monitor during reverse travel.

Optional apps are available to provide advanced capabilities delivered via software and when required, additional electronic components and sensors. The advanced app software is enabled by a Software Enabled Attachment (SEA). The SEA is either factory installed or can be purchased for dealer installation.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEA's. For dealer installation, select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (<https://fps.cat.com/>).

CAT PRODUCTION MEASUREMENT APP

- NOTE:
- Allows on-the-go weighting of the bucket payload during the lift cycle with a nominal accuracy of + /-1%.
 - Records date, time, weight, loading cycle count, up to 20 material IDs and up to 50 truck IDs for up to 1400 truck-loads.
 - Daily payload, productivity (tonnes/hour or tons/hour) & efficiency (tonnes / liter or tons / gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (VisionLink subscription required)
 - Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpC software (VIMSpC and VIMS data cable are required, but VIMS is NOT required).
 - Payload tickets can be printed with an optional printer.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

NOTE: Reference the TRA Classification below when selecting tires to ensure the machine has the appropriate tire for the machines application.
L2 - Traction
L3 - Rock tread for construction, stock piling, and truck loading applications
L4 - Deep rock tread for load & carry applications with long cycles
L5 - Extra deep rock tread for face loading in mines & quarries and severe applications

FLEXPORT TIRES

Cat Flexport are solid tires designed for severe applications where normal tires would be quickly damaged like in scrap or waste handling. They are designed with holes molded through the outer ring of the tire's sidewalls to improve tire flexibility and stability. The increased tire flexibility allows the Cat Flexport tire to handle all surfaces with a greatly improved ride and to absorb much of the shocks that another solid or filled foam tire passes on to the operator and machine. The result is increased operator comfort, reduced operator fatigue and reduced machine stress.

P	394-3949	FLEXPORT, 26.5 R25 SMOOTH 0 Smooth Tread tires for applications where traction is not a concern but where the material, like glass, can cause chunking of a construction type tread - Machine oscillation is reduced		\$17,310
P	394-3950	FLEXPORT, 26.5 R25 TREADED 0 Treaded tires, highly recommended for glass, asphalt, brick and scrap yards - Machine oscillation is reduced		\$14,240

WORK TOOLS**AVAILABILITY FOR BUCKETS**

NOTE: "GET" is NOT automatically included on bucket orders. GET must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from "GET" listed immediately following the bucket listing.

NOTE: Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for General Purpose Buckets and material handling buckets.

NOTE: Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maximum payload may cause loader instability.

NOTE: For availability of listed buckets & worktool please call (630-859-5320) or contact your marketing subsidiary machine coordinator.

TECHNOLOGY PRODUCTS**CAT CONNECT SOLUTIONS APPS**

Cat Connect Apps make smart use of technology allowing the operator and/or owner to monitor, control and manage equipment. Information is delivered on-board via an 18 cm (7in) color multi-function touch screen display and wirelessly to the VisionLink™ fleet management web portal (VisionLink subscription required). The multi-function display as well as the Core and Basic Apps are standard equipment.

Note: the image from the standard rear-view camera is also displayed on the multi-function monitor during reverse travel.

Optional apps are available to provide advanced capabilities delivered via software and when required, additional electronic components and sensors. The advanced app software is enabled by a Software Enabled Attachment (SEA). The SEA is either factory installed or can be purchased for dealer installation.

NOTE: Refer to Information Release Memo (IRM) EES03-01 (PELJ0138) in the Electronic Sales Library for further explanation of SEA's. For dealer installation, select the Product Support tab and search for media number PELJ0138. Refer to REHS1238 for how to obtain a Factory Level Password. Contact FPS: Internet with Corporate Web Security (CWS) (<https://fps.cat.com/>).

CAT PRODUCTION MEASUREMENT APP

- NOTE:
- Allows on-the-go weighting of the bucket payload during the lift cycle with a nominal accuracy of + /-1%.
 - Records date, time, weight, loading cycle count, up to 20 material IDs and up to 50 truck IDs for up to 1400 truck-loads.
 - Daily payload, productivity (tonnes/hour or tons/hour) & efficiency (tonnes / liter or tons / gal) data is reported wirelessly via Product Link to the VisionLink fleet management web portal (VisionLink subscription required)
 - Detailed payload, productivity and efficiency data can be downloaded to a laptop computer for analysis in the optional VIMSpC software (VIMSpC and VIMS data cable are required, but VIMS is NOT required).
 - Payload tickets can be printed with an optional printer.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, we may contact the dealer. However, in some cases, we will change to an alternative premium brand tire without notice. If the tire type cannot be supplied, we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As consequence of possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4.
Tires are tubeless & non-directional unless otherwise stated.

For tire availability contact your Account Coordinator.
Other tires are available upon request.

L	347-5266	AXLES, EXTREME TEMP (SEALS) 0 FOR USE WITH LANE 3 ONLY Installs high and low temperatures duo cone axle seals in both front and rear axles. Seals are recommended for ambient temperatures from -40F to + 300F.		\$900

SUSPENSION SYSTEMS**RIDE CONTROL**

If the ride control option is selected, then this provides a suspension system by placing two accumulators in the lift circuit. Manual off and automatic mode selection. In auto mode the suspension system engages when reaching preset value. It reduces bounce caused by bucket-induced loads when traveling loaded or unloaded. For use in high speed roading, load and carry, and any other application in which load retention, bucket spillage, or operator ride may be a problem. This option is ideal for government bid specifications.

TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires are tubeless, include heavy duty rims and come in a set of 4.

NOTE: 42PR tires may be used to improve lateral stability. Recommended for use with uneven floors and/or high truck loading heights with dense materials.

NOTE: Block Handler orders require 42PR or ** Tires. HLA Rims are highly recommended.

NOTE: Millyard orders require 42PR or ** Tires and HLA Rims.

NOTE: Michelin tires are not available for Block Handler or Millyard orders.

BUCKETS**AVAILABILITY FOR BUCKETS**

Buckets must be ordered Installed on a Machine Order.
For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.
For availability of loose buckets please call (800) 255-2372.

If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

Please feel free to email us with any questions, comments, or requests at LWLBuckets@cat.com

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing. Rock bucket selections list "GET" for spade or straight edge.

Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maximum payload may cause loader instability.

All listed Maximum Recommended Material Densities are based on the maximum gross weight that the 988H is rated for minus the weight of the bucket and all required G.E.T. at 100% fill factor.
